Several manufacturers have developed special processes by which zinc coatings are applied to steel conduits and the like. Such products are under label service of the Underwriters Laboratories Incorporated and have proved to be acceptable methods of zinc coating as well as the hot dip method.

Such products may be sold under various trade names of the manufacturer, "Sheraduct" is one of these acceptable types. Look for the U L label on the product.

Richard A. Dell, Chief  
Applications and Loans Division
